Frontend Developer · React.js · JavaScript · HTML5 · CSS3

PROFESSIONAL SUMMARY

Frontend Developer who ships — not just codes. Builds performance-audited, mobile-first web apps with a designer's eye and a developer's precision. Proven across 4 real projects spanning REST API integration, scalable component architecture, usability auditing, and Lighthouse-measured optimisations. Identifies UI/UX gaps, proposes fixes, and delivers them — ready to contribute from day one.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Design, Flexbox, CSS Grid, Media Queries
UI/UX: Wireframing Concepts, User Flow Design, Usability Auditing, Skeleton Loading, Mobile-First Design
Tools: Git, GitHub, VS Code, npm, Chrome DevTools, Lighthouse, REST API, JSON, Fetch API
Concepts: DOM Manipulation, Pagination, Dynamic Filtering, Design Systems, Scalable Architecture
Other: Python (Basic), MERN Stack Fundamentals

PROJECTS

Hetuk Restaurant Website | *HTML5, CSS3, JavaScript, REST API, Chrome DevTools* | [Live Demo](#)

- Cut perceived load time by ~40% as measured by Lighthouse scores by introducing skeleton loading screens and batching REST API calls — eliminating render-blocking requests entirely.
- Redesigned menu browsing UX with dynamic filtering and pagination across 50+ items — users reach their target dish in under 2 interactions, down from unrestricted scrolling.
- Caught and closed 3 critical usability gaps — broken mobile layouts, inconsistent error states, and silent API failures — through structured Chrome DevTools audits before any public deployment.
- **Architected a separation-of-concerns structure** across HTML, CSS, and JS so new sections plug in without touching existing logic — zero refactoring needed for future feature additions.

Modern Shop Website (Group Project) | *HTML, CSS, JavaScript* | [Live Demo](#)

- **Sole owner of 5 core UI pages** — navbar, home, shop, product, and cart — in a 4-person team; delivered all modules on schedule with zero merge conflicts using a Git branching strategy.
- Eliminated visual inconsistency across 4 pages by introducing a shared component pattern for reusable layout sections — cut redundant CSS by an estimated 30% and unified the design system.
- Identified a checkout UX bottleneck and redesigned the cart interaction flow, reducing steps to purchase from 4 to 2 — a direct improvement to task completion efficiency.

Hetuk Tea Point | *HTML5, CSS3, Flexbox, CSS Grid* | [Live Demo](#)

- Delivered pixel-perfect responsive layouts across 5 screen sizes — mobile, tablet, and desktop — with zero layout-break issues, built entirely with Flexbox and CSS Grid, no external frameworks.
- Restructured product display into categorised sections based on information hierarchy principles — users locate items faster without scanning the full catalogue, reducing cognitive load.
- Optimised CSS animations from the Anime Website project and merged the 60fps scroll technique into the Tea Point UI, consolidating two projects' learnings into a single production-ready build.

Anime Website | *HTML5, CSS3* | [Live Demo](#)

- Engineered a performant horizontal poster-scroll layout that solved a common media-site usability problem — content overflow — through deliberate CSS containment and overflow architecture.
- Achieved smooth 60fps scroll behaviour on mid-range devices by profiling and eliminating layout-triggering CSS properties, applying performance principles typically reserved for JS-heavy apps.

EDUCATION

KES Shroff College, Mumbai University

Bachelor of Science in Information Technology (B.Sc. IT) — CGPA: 6.40

Mumbai, India

2023 – 2026

Nagindas Khandwala College

HSC — Commerce with Mathematics & IT — 73%

Mumbai, India

2021 – 2023

St. Francis De Sales High School

SSC — 83%

Mumbai, India

2021

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025** — Certified AI Foundations Associate
- **LLMs using Python** — Techfest IIT Bombay (*built prompt pipelines and explored API-based LLM integration*)
- **Python Programming Workshop** — Techfest IIT Bombay
